Overview

TITLE	Teaching Auditors to Be Better Thinkers
PRESENTER	Toby Groves, Ph.D.
DATE AND TIME	Wednesday, April 26, 2023 11 AM ET (10 AM Central / 9 Mountain / 8 AM Pacific)
LOCATION	Zoom Webinar
CPE CREDITS	2 CPE Credits in Auditing
NO. IN SERIES	3 of 6 - 2023 Spring Series

Program Description

Designed especially for auditors, this class is a practical call to action that provides auditors with the tools and inspiration they need to be better thinkers. You'll learn habits and strategies you can use every day to dramatically improve judgment and decision-making. You'll learn how to break down mental barriers and alleviate mental fatigue. You'll achieve new levels of mental clarity, flexibility, and resilience. You will also benefit from better overall mental well-being and be more resistant to stress and burnout. Attendees leave as more powerful and confident thinkers and better communicators and problem-solvers.

Learning Objectives

- Apply “Signal to Noise Ratio” to skeptical reasoning
- Apply the concept of “orientation” to see connections between ideas
- Apply “offloading” to achieve mental clarity
- Identify the “surface structure” and “deep structure” of problems

Who Should Attend

- Internal audit & government audit assurance and consulting professionals
- Chief Audit Executives
- Certified Public Accountants and Certified Fraud Examiners
- Executives, managers, and supervisors at all levels in every organization
- Board Audit Committee members
- Business consultants
- Journalists

About Your Instructor

Dr. Toby Groves is a speaker and researcher on thinking quality and develops innovative thinking strategies for high-stakes decision-making and problem-solving. He teaches targeted cognitive strategies that help experts make high-stakes decisions and develop a thinking system and improve the quality of their thinking. He is known for engaging audiences in live experiments, so they experience the learning points he teaches.

Toby has a Ph.D. in Psychology, M.S. in Industrial Organizational Psychology and is trained in a unique combination of forensic psychology and forensic accounting. His research focuses on expert judgment in complex, high-pressure environments. A popular speaker amongst leading organizations in industry, government, and academia, Toby works with experts that provide society's most critical services including the audit, intelligence, investigative, legal, and medical communities.
