Fall Webinar Series

Overview

TITLE	The Impact of AI, ChatGPT & Other Emerging Technologies on Audit Analytics
GUEST PRESENTER	Steve Biskie
DATE AND TIME	Wednesday, November 1, 2023 11 AM ET (10 AM Central / 9 Mountain / 8 AM Pacific)
LOCATION	Zoom Webinar
CPE CREDITS	2.0 CPE credits in Auditing
NO. IN SERIES	Fall Webinar Series Program 4 of 6

Program Description

Since its release less than a year ago, ChatGPT and other similar large language learning models have dominated the technology hype cycle. In the broader category of Artificial Intelligence (AI), the pace of change has significantly expanded the “Art of the Possible.” In this session, we will discuss the impact of these emerging technologies on audit analytics, including both the benefits and potential risks to your organization.

In this session, guest presenter Steve Biskie will return for his record breaking fourth time to our Fall Webinar Series to deliver proven advice, techniques and suggestions you can apply in your work right now. We'll specifically block time for your questions, discussion and on-line conversation. Come prepared with your analytics questions – and leave with the answers you need to advance your own analytics efforts in 2024 and beyond.

- Consultants
- Certified Public Accountants and Chartered Accountants
- Certified Fraud Examiners
- Business executives, managers and supervisors at all levels
- Journalists

About Your Instructor

Steve Biskie is a Principal at RSM, where he leads the Center of Excellence for Risk Analytics & Automation. He has over 25 years of experience spanning all 3 Lines of Defense, and specializes in transforming inefficient and outdated processes and technologies to optimize GRC and audit performance. He helps organizations from the middle-market to the Fortune 100 implement high-value, sustainable analytics and continuous monitoring programs. Steve has a passion for using technology to automate mundane, time-consuming tasks to allow organizations to re-focus attention on high-value, thoughtful, and data-informed analysis. Steve is a published author, an internationally-recognized speaker on risk and compliance-related topics, and a five-time IIA All-Star Speaker.

Steve started his career as an external auditor for Deloitte & Touche (Deloitte), where he was first exposed to data analytics. He was a part of the team that developed Deloitte's first statistical inventory cycle-counting applications. He became proficient with Easytrieve, SAS, MS Access, and ACL during the period, and eventually developed Deloitte's first extensive data analysis routines for SAP system audits. He has since gained experience with Alteryx, Arbutus, BusinessObjects, Qlikview, and Tableau. His expertise in data analytics eventually led his hiring by ACL Services (now Galvanize), where during his more than five-year relationship, he re-designed ACL's training and consulting strategy, and managed many of ACL's largest and most strategic client consulting initiatives within both Fortune 100 and public sector clients.

Always a proponent of smarter auditing through the use of data analysis, Mr. Biskie has been speaking on the topic of continuous auditing and monitoring for more than a decade, including multiple keynote presentations on the topic. He is the developer of the Successful Audit Data Analytics course offered

through aci Learning (formerly the MIS Training Institute), and is considered an expert on interrogating SAP data, among other ERP systems.
