Artificial Intelligence Is Rewriting Cyber Security Rules: How This Is Happening & How Should You Prepare

JOHN J. HALL

Wednesday, November 18, 2026

Overview

TITLE	Artificial Intelligence Is Rewriting Cyber Security Rules: How This Is Happening & How Should You Prepare
PRESENTER	Jerry Wynne, CISA, CISSP, CRISC
DATE AND TIME	Wednesday, November 18, 2026 11 AM ET (10 AM Central / 9 Mountain / 8 AM Pacific)
LOCATION	Zoom Webinar
CPE CREDITS	2.0 CPE credits in Auditing (Information Technology)

Program Description

Best practices, regulations and standards all require organizations to build and document sound internal controls. Certainly not a new concept. But 'internal controls' have come to mean many things to many people over the years – depending on work responsibilities, organization culture, policies and procedures in place, and each manager's interpretation of their responsibilities. The result is a mishmash of misunderstanding and confusion about what should be a fairly simple purpose.

In this session, we'll explore what 'internal controls' should really mean to the typical manager, executive, staff member and auditor. We'll look beyond decades-old control models that were supposed to be comprehensive all-in solutions but often failed to keep up with the speed of technology, competition, mixed employee skills, and the day-to-day realities of control purpose and execution. Last, we'll share talking points and examples auditors and other compliance leaders can use when discussing controls – whether in one-on-one conversations or more formal training programs.

Learning Objectives

- Discover the impacts of the rapid changes occurring in Artificial Intelligence.
- Explore real-world scenarios where Artificial Intelligence is making traditional Cyber Security methods and processes obsolete
- Analyze how Artificial Intelligence is changing how Cyber Security manages risks in the future
- Identify indicators of where Cyber Security is not adapting to changes and risks posed to organizations
- Build practical strategies for auditors and business leaders to navigate uncertainty in IT responsibilities and enhance oversight
